

CCDC Inject

INJECT NAME	Defining Ports
INJECT ID	NETW22T

INJECT DESCRIPTION:

Firewall security policies and access-lists in general are best written as narrowly as possible. For the following services complete the table:

Service	Direction	Source Port	Destination Port	Protocol
Web Services	Inbound		80	
Web Services	Outbound		80	
Web Services	Inbound	80		
DNS Lookup	Outbound			UDP
SSH	Outbound			TCP
Telnet	Inbound			
SNMP Traps	Either Direction			

INJECT DELIVERABLE

Respond with a clearly written business memo that presents a completed table.
