

# CCDC Inject

<b>INJECT NAME</b>	Preserving Legal Rights
<b>INJECT ID</b>	LEGP21A

## **INJECT DESCRIPTION:**

The Chief Legal Counsel's office is concerned that we are not in a good legal position to prosecute unauthorized access, and that we may be exposing information in our logon information that could aid an attacker in an attack.

Take steps to correct this shortcoming with regard to interactive network access to our devices, both internally and externally. In the event of unauthorized access to the organization's network and IT resources, we need to be able to take legal action and avoid the hacker's defense of claiming: "they didn't know".

## **INJECT DELIVERABLE**

Respond with a business memo describing the steps you took to remediate and implement this concern from the Chief Legal Counsel's office. Be specific and document your results with screen shots. Every device that allows for an interactive login should be displaying the correction information in this regard.
