

# CCDC Inject

<b>INJECT NAME</b>	Firewall Critique
<b>INJECT ID</b>	TOOL02A

## **INJECT DESCRIPTION:**

In the topology there are firewalls from two different manufacturers: Cisco and Palo Alto Networks. From the team's experience, develop a critique of each firewall in terms of:

- Accessibility of features, are they easy to configure and understand.
- Usability of the GUI Interface.
- Usability of the command-line.
- Are they feature comparable ?
- Availability of documentation and training.

Does the team prefer one of the the other and why. It could be based on experience with one product over the other, or ease of use, or lack/presence of features.

## **INJECT DELIVERABLE**

Respond with a business memo addressing each of the 5 areas of the question plus a statement of preference with explanation.
