

CCDC Inject Scoring Rubric

INJECT NAME	Install OpenRefine Data Analytics Software
INJECT ID	SOFT12T
MAX SCORE	100

INJECT DESCRIPTION:

The company is starting a new Data Analytics Department. They need to have the tool OpenRefine installed in the companies infrastructure to evaluate for some initial projects. Select a platform in the topology that would best support this tool and install it. Reference site: <https://openrefine.org/download> for distribution media.

INJECT SCORE COMPOSITION:

- 20% - Clearly written business memo.
- 40% - Explanation for the platform selection, such as it may best match the skills of the team, or better usability on one platform or the other, or if a container was selected reasons may be portability, or ease of installation.
- 40% - Evidence.

INJECT DELIVERABLE:

Respond with a business memo documenting where (which server or environment) the software was installed. Explain why this particular platform was selected versus the other servers and environments that were available. Provide evidence of the installation and a functional installation.

CHAT/GPT RESPONSE:
