CCDC Inject

INJECT NAME	Enable SFTP on FTP Server
INJECT ID	CRYP06T

INJECT DESCRIPTION:
Build an SFTP server and use certificates generated by the organization's certificate authority.

INJECT DELIVERABLE
Respond with a clearly written business memo that outlines steps taken to build the server, generate and install the certificates. Demonstrate successful functionality by access the SFTP service from a client. Use screen shots to document the significant installation steps, and the functionality.
