CCDC Inject

INJECT NAME	Centralized Network Time
INJECT ID	NETW19T

INJECT DESCRIPTION:
Consistent and accurate time is important for log entries and for all network devices to perform their operations. Design a solution, using the NTP protocol, for your enterprise network. There should be one internal source that provides time to all other devices.

INJECT DELIVERABLE
Respond with a business memo with the following specific responses:

1.) What NTP Stratum does/should your internal time source represent, and specifically what device is the centralized time source within the network.

2.) For each device provide a short statement as to how you configured the device, such as command line statements, editing a configuration file, or setting a parameter in a GUI interface.

3.) For each device show a screen shot with the synchronize status.

4.) Clearly identify devices that were not configured to synchronize with NTP.
