CCDC Inject

INJECT NAME	Write Power Shell Script to Find Read/Write Files
INJECT ID	WINS06T

INJECT DESCRIPTION:
Develop a Power Shell script to find public READ/WRITE files. Use the script on each Windows server. Evaluate the findings and if any of these files should have their permissions changed to be more restrictive. Provide your review and analysis for each server.

INJECT DELIVERABLE
Respond with a business memo that shows the development of the script with screen-shots from a Windows host showing it functioning. Provide your analysis for each server.
